Selection of student Performance Goals

Triangulation of Data and Rationale for Selection

Student Performance Goal #2:

All students will improve their math skills in all curricular areas.

Essence: Students will improve their understanding of patterns, functions and algebra.

Triangulation of Data: We chose this goal based on triangulating the following data sources:

1. Terra Nova
2. STAR MATH
3. Former Parent/ Focus Group?
4. Former Student/ Focus Group
5. Current Parent/ Focus Group
6. Current Teachers' survey of former students

Rationale for Selection: The faculty met and analyzed the scores on the Terra Nova Assessment. Terra Nova data showed us that the scores for patterns, functions, and algebraic equations were one of the lowest areas.
